PROFILE

Frontend developer, UX designer, and problem solver. I code things from scratch and create beautiful designs that put the user front and center. I'm highly empathetic towards product users and their needs, and I love to create thoughtful, simple things that make lives easier.

I'm a constant learner who remains committed to achieving mutual growth wherever I find myself.

SOME OF MY PROJECTS

Quote-Generator - A Javascript project by Uneku

This is a web app that generates random quotes from an API. Quotes can also be tweeted directly from the app.
